

## COMPUTING & ICT

### Meet Our Computing & IT Students

#### Meet Darcey

##### **Level 3 Extended Diploma in IT**

"I would recommend the course to students who feel that A Levels are not right for them and would prefer to work in the technology and gaming industry. This course would give you the skills required to move forward, either at university, apprenticeships or starting your own online business."

#### Meet Tariq

##### **Level 2 Extended Certificate in IT**

"The course involves learning about computer networks, graphics, how websites work and some coding. We work on projects based on real life company briefs so we get a taster of what it would be like in the real world."
