

Dormers Wells High School: Geography

Geography and our environment

Geography is the study of the world and what we can see around us. In Geography we study a lot of topics, and we look at our physical environment and our human environment.

Task one: What Geography have you done in your school so far? You can write some keywords or sentences

Write this in the space below.

In Geography, we look at our physical environment.

Task two: Find out what the physical environment means and write a definition here

Physical environment:

We also look at our human environment and what people do.

Task two: Find out what human environment means and write a definition here

Human environment:

All around us, we have lots of things that are made by humans, and things that are natural and not made by humans. Task three: Look at the images below. Write underneath the images which three are made naturally, and which three are made by humans.

Even in our local area, in places like Southall, Greenford and Northolt, there are many human and physical features in our environment.

Task four is a challenge task: Research on the internet or ask your family what human and physical features there are near where you live. See if you can find out one physical feature and one human feature and write them down below. If you can, draw pictures of them too!
